PROFESSIONAL SUMMARY

Software Engineer at Cognizant with 3 years of enterprise web application experience. In my current ColdFusion (CFML) role for Savvas Learning Company, I deliver web features, integrate REST APIs, and work with SQL Server and Oracle. My Java experience comes from a six-month Cognizant internship using Java, Spring Boot, Spring Data JPA, Hibernate, and JSP. Seeking a Java role where I can apply that foundation alongside production experience in SQL, debugging, testing, and Agile delivery.

TECHNICAL SKILLS

Languages & Web	Java (internship), ColdFusion (CFML), SQL, HTML, CSS, JavaScript, jQuery
Java Frameworks	Spring Boot, Spring Data JPA, Hibernate, JSP (internship)
Databases	Microsoft SQL Server, Oracle Database, SQL queries, stored procedures
Server & Admin	ColdFusion Administrator, Windows Server (RDP), IIS
Cloud	Azure Fundamentals (AZ-900), Azure Data Fundamentals (DP-900)
Practices	REST API integration, debugging, query optimization, Agile / Scrum
Concepts	Object-oriented programming, MVC, software development lifecycle
Tools	Git, GitHub, Postman, AI-assisted development

PROFESSIONAL EXPERIENCE

Software Engineer — ColdFusion Developer

Sep 2023 – Present | Chennai, India

Cognizant Technology Solutions

Promoted: Software Engineer Trainee → Junior Software Engineer → Software Engineer · Client: Savvas Learning Company (K-12 EdTech)

- Develop, test, and deploy ColdFusion (CFML) web application features for the Savvas Learning Company K-12 digital learning platform.
- Integrate REST APIs with CFML modules, maintain legacy code, and investigate application defects.
- Write and optimize SQL queries and stored procedures in Microsoft SQL Server and Oracle to support features and reporting.
- Configure datasources, scheduled tasks, and mappings in ColdFusion Administrator; support Windows Server deployments.
- Troubleshoot application and database issues, collaborating with cross-functional teams in an Agile delivery model.
- Build web interfaces with HTML, CSS, and jQuery, and coordinate releases with onshore client teams.

Software Engineer Intern

Jan 2023 – Jun 2023 | Chennai, India

Cognizant Technology Solutions

- Completed a six-month internship focused on Java web application development using Spring Boot, Spring Data JPA, and Hibernate.
- Implemented server-side features and JSP-based interfaces using HTML, CSS, and jQuery.
- Applied object-oriented programming and MVC concepts while developing, testing, and debugging application features.

PROJECTS

UniERP — Universal Enterprise Resource Planning System (Personal project, in progress)

github.com/kannan19302/UniERP

- Developing UniERP as an open-source, self-hostable, multi-tenant ERP platform; moved the project from a monorepo to a layered polyrepo.
- Building TypeScript services with NestJS and organizing API contracts and data models in dedicated repositories.
- Developing a Next.js and React web client with a Prisma and PostgreSQL data layer.
- Using Redis and BullMQ for caching and background jobs; documenting tenant isolation and role-based access control.
- Adding Vitest, Playwright, and GitHub Actions checks as the project develops.
- Directing AI coding agents through documented planning, implementation, and review steps.

PROFESSIONAL DEVELOPMENT

- Use AI coding agents and GitHub to plan, implement, and review UniERP project work.
- Study data structures, algorithms, and system design for backend engineering interviews.
- Practice modular backend design through NestJS services, API contracts, and Prisma data modeling.
- Improve testing and delivery skills with Vitest, Playwright, and GitHub Actions on UniERP.

EDUCATION

B.E., Electronics & Communication Engineering

Dr. Mahalingam College of Engineering & Technology, Pollachi · 2019 – 2023

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Certified: Azure Data Fundamentals (DP-900)
