

Kannan Rajagopal

Software Engineer — Java / Spring Boot Developer

Chennai, Tamil Nadu | +91 63807 98701 | kannan19302@gmail.com | linkedin.com/in/kannan--rajagopal | github.com/kannan19302

PROFESSIONAL SUMMARY

Software Engineer at Cognizant with nearly 3 years of experience building enterprise web applications and a strong foundation in Core Java and Spring Boot. Began my career developing Java-based applications with Spring Boot, Hibernate, and JPA, and currently engineer scalable web features end-to-end — integrating REST APIs and optimizing complex SQL across SQL Server and Oracle. Microsoft Azure certified, with solid grounding in OOP, the full software development lifecycle, and Agile delivery. Eager to apply my Java / Spring Boot skills in a backend or full-stack engineering role.

TECHNICAL SKILLS

Languages	Core Java, SQL, HTML, CSS, JavaScript, jQuery
Frameworks & Libraries	Spring Boot, Hibernate, Spring Data JPA, JSP, REST APIs
Databases	Microsoft SQL Server, Oracle Database
Concepts	OOP, SDLC, MVC, Performance Optimization
Cloud	Microsoft Azure (Certified)
Practices & Tools	Agile / Scrum, Debugging, Git, Windows Server (RDP)
Additional	ColdFusion (CFML) — current role
Languages (Spoken)	English (Professional), Tamil (Native)
AI & Tools	AI-assisted development (Claude, AI coding agents), Git, GitHub, Postman

PROFESSIONAL EXPERIENCE

Software Engineer

Sep 2023 – Present | Chennai, India

Cognizant Technology Solutions

Promoted: Software Engineer Trainee → Junior Software Engineer → Software Engineer · Client: Savvas Learning Company (K-12 EdTech)

- Engineer end-to-end web application features — design, coding, testing, and deployment — for Savvas Learning Company's K-12 digital learning platform.
- Integrate REST APIs and optimize legacy modules to improve application performance and reliability.
- Design and optimize complex SQL queries and stored procedures across Microsoft SQL Server and Oracle databases.
- Apply object-oriented design and clean-code principles to build maintainable, scalable solutions.
- Troubleshoot and resolve defects, collaborating with cross-functional teams in an Agile / Scrum model.

Software Engineer Intern — Java

Jan 2023 – Jun 2023 | Chennai, India

Cognizant Technology Solutions

- Developed Java-based web applications using Spring Boot, Spring Data JPA, and Hibernate during a 6-month engineering internship.
- Built server-side features and dynamic front-ends with JSP, HTML, CSS, and jQuery.
- Implemented industry best practices across the development lifecycle and delivered high-quality solutions, earning a full-time offer.

PROJECTS

UniERP — Universal Enterprise Resource Planning System (Personal project, in progress)

github.com/kannan19302/ERPSys

- Architecting a composable, multi-tenant ERP system spanning 33 modules across finance, HR, CRM, manufacturing, healthcare, and education.
- Built with Next.js 15, React 19, and NestJS on an event-driven backend, using PostgreSQL with Prisma ORM, Redis, and BullMQ for queues/caching.
- Developing solo end-to-end using AI-Agent Driven Development (AADD) — directing AI coding agents through planning, implementation, and review.
- Applying production-grade practices: RBAC/multi-tenant auth, automated testing (Vitest, Playwright), Docker, CI/CD via GitHub Actions, and observability (Prometheus, OpenTelemetry, Sentry).

PROFESSIONAL DEVELOPMENT

- Actively upskilling in AI-assisted software development — using AI agents for code generation, refactoring, and debugging in personal projects.
- Strengthening core computer science fundamentals: data structures, algorithms, and system design for product-engineering interviews.

EDUCATION

B.E., Electronics & Communication Engineering

Dr. Mahalingam College of Engineering & Technology, Pollachi · 2019 – 2023

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Certified: Azure Data Fundamentals (DP-900)
